

MANAGEMENT POLICY

AMAC Corrosion Protection Pty Ltd design, manufacture and supply corrosion protection systems and corrosion protection products. AMAC is primarily involved in the manufacture and assembly of galvanic and impressed current anodes and associated cathodic protection equipment and accessories.

AMAC is committed to providing quality product; this is achieved by all personnel, from all levels within the organisation working as one team.

ISO9001:2008 provides us with a foundation for ensuring we meet and exceed Australian and International best practice, as well as grounding for ongoing improvement.

Our commitment to continual improvement includes:

- Providing practical, high quality, cost effective products and services that exceed perceived and stated requirements.
- Manufacturing products that conform to internationally recognised standards.
- Ensuring that our manufacturing and testing processes are efficient and effective.
- Ensuring the company remains profitable.

Committing to these objectives, results in a highly competitive position in the market, and strengthens our reputation as an industry leader.
